## ABOUT THE BANK

---

At SBM Bank India, we lead with agility and a solutions-focused-approach. As the world expands, and needs and expectations continue to grow, the ideas of yesterday can hardly define, decipher, or decode the complexities of an ever-evolving business landscape. The amalgamation of agile technology and banking expertise has not only enabled us to reach and deliver to a wider audience but also develop unique products with distinct propositions, which help deepen bonds with the customer.

Being a young Indian bank, we are decoding Power, Privilege and Performance to create an exceptional banking experience through the Corporate, Retail and Treasury divisions. India's youngest foreign bank and India's first Universal Bank accredited by the RBI through its Wholly-Owned Subsidiary route, SBM Bank India commenced its India operations on December 1, 2018, and is now operational across 12 branches within the nation.

Featuring a diversified talent pool dedicated to bringing together the best of innovation, compliance, and processes, we are scaling our growth trajectory within one of the world's most vibrant and large markets - India. As part of a multinational group, we also offer seamless solutions to leverage our parent's Asia and Africa market presence and experience.

As a new-age digital-forward premium banking institution, SBM Bank India offers a preferential suite of best-in-class solutions featuring products and services designed to offer personalised experiences through bespoke banking.

Set on the course of exponential growth, we continue to take a co-creative approach to seize and serve the globalised and restless marketplace that demands omnichannel synergy and integrations across the board.
